

Hot Enough for You?

This summer's extreme heat and dryness in Colorado have prompted a statewide ban on fires and fireworks. Why not visit a safe website where you can view explosions and flames that are thousands of times bigger than our whole planet? These images were recorded by the Solar X-ray Imager on the NOAA GOES-12 satellite. Stills and animations of solar activity recorded in 2000-2001 are available online at NGDC.

If you have questions about the SXI archive and this public interface please contact Daniel.C.Wilkinson@noaa.gov
